Resident Survey for Historic Preservation District

Many factions are competing for land use in our neighborhood, and we should decide if we prefer to retain our neighborhood as is (single family houses), or encourage developers to purchase and redevelop portions of the neighborhood (new mixed-use developments). This could affect your property value and ability to continue living in your house in the future, and the overall use of the land in the long term. A Historic District designation is a way to preserve the character of our neighborhood for generations to come.

We have been asked by the City of Phoenix to poll our residents and determine if we want to pursue a Historic Preservation District for our neighborhood.
